
MARIO D. ATKINS

LEARNING & PERFORMANCE / FINANCIAL SERVICES / APPLIED AI

PALM BAY, FL 321-537-2876 mario.data.leader@gmail.com [LINKEDIN](#)

I turn operational friction into learning people can use.

Nearly 15 years in financial services, spanning dispute escalations, employee development, member-experience analytics, and process improvement. I connect frontline reality with practical learning solutions, use Qualtrics and Excel to diagnose performance gaps, and apply AI with deliberate source checks and human oversight.

THE THROUGHLINE Find the friction. Diagnose its cause. Design what changes performance.

SELECTED EVIDENCE

Voice of the member, translated into action / QUALTRICS + EXCEL

- Analyzed member and internal feedback, exported survey data, categorized complaints, and traced recurring patterns through root-cause analysis.
- Distinguished employee knowledge gaps from process and policy defects so recommendations addressed the actual cause, not just the visible symptom.

Learning designed for real frontline work / EMPLOYEE DEVELOPMENT

- Created JeopardyLabs games, knowledge quizzes, and practical coaching activities to reinforce banking procedures and improve employee readiness.
- Mentored colleagues before formal management and, as a leader, helped develop five employees who earned promotions over four years.

A process made visible / VISIO + CROSS-FUNCTIONAL WORK

- Mapped a six-stage wire-service journey showing verification, member intake, processing, and handoffs; used visual storytelling to examine workflow complexity.
- Initiated related 2022 work with Marketing on clearer self-service wire instructions, coordinating proposals through Asana and senior stakeholders.

Structured AI with a verification discipline / AI-ASSISTED DESIGN

- Directed specifications for a 64-form digital-workflow initiative, including conditional fields, signer roles, completeness checks, and repeatable standards; 23 templates completed by late September 2026.
- Reviewed AI-generated guidance against source documents and real platform constraints; created concise remote-notarization job aids grounded in user workflows.

WORKING TOOLKIT

INSIGHT Qualtrics · Excel · feedback taxonomy · root cause · Six Sigma

DESIGN Visio · PowerPoint · JeopardyLabs · onboarding · job aids

DELIVERY ChatGPT · Claude · Asana · Google Workspace · source validation

EXPERIENCE

SPACE COAST CREDIT UNION / APR 2011 - JAN 2026

Assistant Branch Manager (2017-2026) • Assistant Manager (2015-2017) • Member Service Specialist II / Specialist (2011-2015)

- Led member-facing financial operations and staff development, supporting policy adherence, service quality, transaction accuracy, and complex escalations.
- Used Qualtrics feedback and Excel tracking to diagnose service and performance concerns, inform coaching, and recommend operational changes.
- Supported over \$300,000 in fraud-related matters and escalations, including a \$48,705 unauthorized-withdrawal case resolved within three business days.
- Built practical performance trackers and worked with internal stakeholders to understand root causes, strengthen controls, and improve member journeys.

THE FLORIDA NOTAIRE / 2020 - PRESENT

Founder • Florida Remote Online Notary

- Operate an independent, identity-sensitive document-services practice; completed more than 1,500 remote online notarizations using Proof.
- Develop structured document workflows, procedural guides, and quality checks; use AI-assisted research and content drafting with independent review for accuracy and compliance.

TELUS INTERNATIONAL AI DATA SOLUTIONS / SEP 2023 - SEP 2024

Remote Qualitative Data Analyst / Search Quality Evaluator

- Applied structured evaluation guidelines to digital content and search results, documenting judgments and analyzing relevance and consistency.
