Risk Analysis · Fraud Investigation · Compliance Review · Root Cause Analysis · Process Improvement

SUMMARY

Analytical investigator with 15 years of experience in regulated financial environments. Consistently applied the same method across different domains: identify what is unclear or disputed, reconstruct the underlying reality from available evidence, find the pattern others missed, and produce a documented, defensible finding or recommendation.

Proven across fraud escalation, compliance review, member experience, branch operations, regulatory claims, independent case analysis, and process improvement. The environments changed. The method did not.
